

MAXXON®

**VenTek™
Furring Strips**

HIGH PERFORMANCE FURRING STRIPS: BUILT FOR DRAINAGE. DESIGNED FOR AIRFLOW.

Protect your building with a solution engineered for longevity and performance. VenTek™ Furring Strips are a fabric-backed, entangled polymer mesh designed to promote drainage and ventilation in exterior wall systems. VenTek Furring Strips redefine traditional systems by replacing outdated wood strips with advanced polymer technology. Designed to create a precise gap between your siding and the Weather Resistive Barrier (WRB), they help support code compliance by creating the drainage and ventilation gap that allows your structure to breathe, shedding moisture effectively and protecting against the costly damage associated with trapped water.

- Designed with fabric backing to enhance installation performance
- Promotes reliable drainage to support code compliance
- 50 ft. rolls to speed up installation time
- Resists mold, mildew, and rot

WHERE TO USE

Application

Exterior Wall Systems
For use in exterior wall systems under: Wood siding, Metal siding, and Fiber cement board

For use in other applications, please contact a Maxxon Sales Representative.

BENEATH IT ALL, MAXXON DELIVERS.®

MAXXON®

VenTek™ Furring Strips

HIGH PERFORMANCE FURRING SOLUTIONS FOR EXTERIOR WALLS.

VenTek Furring Strips are designed to create a consistent, reliable cavity behind cladding systems, helping support both drainage and ventilation in the wall assembly. Manufactured for durability and ease of installation, they provide the space needed for moisture to escape and air to circulate. This can be especially valuable in assemblies where managing incidental moisture is critical to long-term performance.

PRODUCT INFORMATION

Thickness	10 mm
Roll Width	3.5" (8.89 cm)
Roll Length	50 ft (15.24 m)
Rolls per Bag	3
Bags on Pallet	90

INSTALLATION & LIMITATIONS

See technical data sheet available at VenTek.pro for limitations and complete installation instructions.
