STRENGTHENING PRIMER

DON'T REPLACE — FORTIFY & REPAIR

Maxxon® Commercial Fortify™ Primer is a single-component primer specially designed for strengthening the surface of gypsum underlayments or lightweight concrete in preparation for resurfacing.

- Addresses old, soft or dusty gypsum underlayments
- Saves time and money vs. replacing old underlayments
- Enhances bond of new Maxxon underlayments
- Fast and easy installation
- Single component, ready for use straight from pail

WHERE TO USE

Application
Multifamily and wood frame construction.

Subfloor
Interior compromised gypsum, lightweight concrete.

BENEATH IT ALL, MAXXON DELIVERS.™

STRENGTHENING PRIMER

STRENGTHEN. PRIME. SEAL.

Maxxon Commercial Fortify Primer's high-performance formula eliminates the need to replace existing underlayments by consolidating, strengthening and priming the old surface. It provides a solid surface for a Maxxon patch or underlayment. Simply apply Maxxon Commercial Fortify Primer with a standard pump sprayer for a fast, easy install.
